DETAILED ACTION

1. Applicant's amendment of claims 3, 5, and 7 and addition of new claims 9-11 in Paper filed 10 January 2002 is acknowledged. Claims 1-2 are cancelled. Claims 3-11 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-11 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-11 are indefinite as the claims refers to an effective amount but do not indicate what is the effective amount.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 3-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yabuta *et al.* (US 5,670,340). The present claims are directed to a method of producing proteins in a culture medium or broth that is supplemented with any one of the amino acids histidine, methionine and glycine. Yabuta *et al.* teaches a process for the production of a protein (including atrial

natriuretic peptide) comprising culturing E. coli host cells transformed with a plasmid capable of expressing the protein (see claim 1, for example). The broth or media used in during the incubation or growth step of the host cell E. Coli comprises 2.0 g/L of L-methionine (see Example 3). Thus, both product and method are taught and the reference anticipates the claimed invention.

5. Claims 3-6 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Zimmerman *et al.* (US 5,169,772). The present claims are directed to a method of producing proteins in a culture medium or broth that is supplemented with any one of the amino acids histidine, methionine and glycine. Zimmerman *et al.* teach an E.coli growth medium that is supplemented with methionine, proline, histidine and thiamine. The growth medium is used in a method of protein production. Thus, both product and method are taught and the reference anticipates the claimed invention.

Conclusion

6. No claims are allowed.
